PC238: ROI: ACCELERATING YOUR TIME TO VALUE WITH PROJECT ONLINE

Questionnaire for Successful Deployments

These questions are designed to help you think in the right direction. The questions are not presented in any particular order.

1. What is your existing experience with Project Professional and Project Server/Project Online?

2. What is your Project Management Maturity level and what are your goals to incorporate that into Project Online?

3. Are you planning on duplicating existing business processes into Project Online or improving business processes?

4. Have you considered a phased approach for deploying features? Do you have specific features you want to target?

5. Will you be configuring a Proof of Concept to validate configuration before actual deployment?

6. What interactions do you anticipate with your resources? Task updates, timesheets, collaboration, etc?

7. What are your needs in terms of security (e.g. Active Directory, Microsoft Federated Security, etc.)?

8. Do you plan to deploy Portfolio features? What experience does your organization have in terms of portfolio selection of projects (e.g. Does your organization have a process in place to map projects to strategic business needs)?

9. What are your project and resource reporting requirements?

10. Will you need post-configuration support and in what format (e.g. support incidents, training, etc.)?

Please contact me with any questions you may have.
